**Subject:** Cemetery Consultation

I wish to express my content with the suggested changes to the Act.

I particularly applaud the change that requires those purchasing a cemetery to be a perpetual Body Corporate - especially given the issues experienced when a private individual owns but disrespects the deceased and their families.

The beefing-up of the role of oversight with the development of a Regulator is also to be applauded, and the change from 30 to 100 years after the last internment before an application for closure, with its attendant potential for restrictions (war and historic graves etc), is very welcome.
