Subject: Submission on Statewide Electric Vehicle charging Network discussion paper

Hi,

I am an electric bicycle user.

1. There does not appear to be any mention in the discussion paper of chargers available for electric bike users.
2. Given the number and uptake of electric bikes in Tasmania, including Australia Post's fleet, I believe it would be appropriate to incorporate some type of facility at charging stations for electric bikes.
3. They could extend the range of electric bikes, especially for touring, and would allow cyclists to make good use of amenities such as the proposed Coastal Walkway between Burnie and Wynyard.
4. In this way, they would raise the potential attractiveness of tourist experiences for those coming to the state.
