

STAFF and VISITOR NOTICE

COVID-19: CHECK IN when you arrive at our work places!

From 1 July 2021 we all need to ‘check in’ using the Check in TAS app when we enter a Government building.

What do you need to do?

- Have the free Check in TAS app downloaded on your device.
- Look for the QR codes displayed in prominent locations at entry points to each Government building.
- Check-in once per day for each government building that you enter.
- If you are unable to check yourself in on your own device, you could be checked in by someone with you, or each building will have another manual process in place to check you in.
- This requirement applies to State Service employees, officers, volunteers, contractors and visitors.

Why are we doing this?

- There is not a moment to lose when contact tracing is underway in response to a COVID-19 case.
- The Check in TAS app gives Public Health rapid access to high-quality information to identify close contacts and help contain the spread of the disease.
- The State Service can lead the way in use of the app to support our Public Health colleagues to keep Tasmanians safe.
