You don't often get email from trudyarcher01@gmail.com. [Learn why this is important](#)

Dear councilors,

I think it is discusting that you would even consider giving yourselves (no matter the position) any more than a 14 percent increase in wages considering the hideous rates, dog registration, microchip , lack of community feedback consideration regarding everyday matters, & increasing financial hardship in our state and communities. I believe this money saved would be better spent on family inclusive consideration like barbeques, toilets and shelters for the elderly who need to walk and sit regularly before continuing to walk a few blocks etc.

You do not have the consent of community's and you waste so much in funds and disposal of equipment you really need to focus on community and reusing infrastructure,(where possible) & reducing red tape.

Set an example and look after the elderly in our community's we have an aging population.

Regards

Trudy Archer
